

Nutrisorb® Zinc Plus Ascorbate (liquid zinc & vitamin C)

Product Information per Daily Intake (10 Drops)

		% EC RDA*
Vitamin C	100mg	166.7
Zinc	7.5mg	50

*RDA = Recommended Daily Allowance

Ingredients:

Purified Water, Zinc Ascorbate, Preservative (Ascorbic Acid).

Additional Information

Nutrisorb® Zinc Plus Ascorbate is a highly bio-available liquid formulation of this vital mineral. Zinc, like most minerals, is efficiently chelated to ascorbic acid (vitamin C) which has a high absorption rate so that lower levels of supplementation may be effective. Nutrisorb® liquid minerals are ideal for individuals with absorption difficulties or for those who have difficulty with swallowing tablets and capsules.

Zinc occurs naturally in human and animal breast milk and fruits and vegetables.

- Zinc is necessary for sense of taste and smell
- Zinc is required for insulin formation and activity
- Zinc is an antioxidant mineral, essential for many vital enzymatic processes
- Zinc is needed for healthy reproductive and immune systems, for tissue renewal, maintenance of the skin and for healthy bones and teeth
- Zinc helps maintain healthy liver function and releases vitamin A from the liver
- Ascorbic acid (vitamin C) is essential for maintaining a healthy immune system
- Suitable for veterinary use as a food supplement for animals
- Suitable for children from 3 months and for the elderly

Allergen Information

None

Recommended Intake

Five drops between 3-6 months of age, ten drops (five drops twice a day) between 6-12 months, and ten drops from 14 years (and adults), taken daily in water, juice or milk with food, or as professionally directed.

Suggested Combinations

Combine with Vitasorb® C to support immune function.
